Career Objective

Results-driven B.Tech Computer Science and Engineering student with strong skills in full-stack development, data structures, and core computer science fundamentals. Experienced in building web applications using the MERN stack, Go, PostgreSQL, machine learning, embedded systems, and Flutter. Seeking software engineering, full-stack, or backend development internships to apply technical and problem-solving skills.

Technical Skills

- **Programming Languages:** Python, C, Java, Go, Dart
- **Web Technologies:** HTML, CSS, JavaScript (ES6+), React.js, Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL, Firebase
- **Frameworks & Concepts:** MERN Stack, RESTful APIs, Flutter (Mobile App Development)
- **Core CS:** Data Structures and Algorithms, OOP, Operating Systems, DBMS, Computer Networks

Technical Qualifications

- Java Programming, C Programming, Python Programming, and Data Structures & Algorithms — Udemy
- MERN Full Stack Development — Udemy

Projects

- **Splitter — Federated Social Media Platform**
Developed a federated social networking platform using Go (Echo), PostgreSQL (Neon), and Next.js with React and Tailwind CSS, enabling cross-instance communication via the ActivityPub protocol. Implemented secure authentication using JWT and decentralized identity (Ed25519 DID) with end-to-end encrypted messaging and core social features. Integrated an AI-powered bot using Gemini/OpenAI APIs and deployed using Render, Vercel, Docker, and GitHub Actions.
- **AI-Based Personalized Learning Platform**
Developed a personalized learning system using core data structures to optimize the learning flow. Graphs used for course modules, Heaps for recommendations, Hash Maps for profiles, and Queues for task scheduling. Implemented Tries for fast content search and Arrays for activity tracking. Adaptive recommendations and real-time progress tracking for personalized learning paths.
- **Zynk – Social Media Web Application (MERN)**
Built a full-stack social media platform using React.js, Node.js, Express, and MongoDB, enabling users to create posts, like content, and manage authentication. Implemented secure user login/signup, interactive newsfeed, and real-time updates to enhance user engagement and scalability.
- **Fake Currency Detection (ML & OpenCV)**
Developed a machine learning model using Python and OpenCV, achieving good accuracy in detecting counterfeit currency notes from a dataset of 800+ images while minimizing false positive rate.

Education

- | | |
|--|---------------------|
| • Amrita School of Engineering | Aug 2023 – Aug 2027 |
| B.Tech in Computer Science and Engineering | CGPA: 8.35/10 |
| • Prathibha College, Rajahmundry | May 2023 |
| Higher Secondary Education | 981/1000 |
| • The Future Kids School, Rajahmundry | Aug 2021 |
| Secondary Education | 94.6% |

Languages

English (Fluent) — Hindi (Intermediate) — Telugu (Native)
